Subject index

Abstracts
  Société de Néphrologie, May 7, 1972, 178
  The Renal Association, May 11, 1972, 179
Ageing
  intrarenal vasculature, 214
Alpha-aminoisobutyric acid
  uptake by rat kidney slices, 101
Angiotensin
  effect on glomeruli, 336
Announcements 57, 114, 181, 239, 296, 352
Antibody
  humoral immune capacity to recurrent E. coli infection, 287
ATP
  content in rat kidney slices, 101
ATPases
  effects due to hypothermic storage of kidney slices, 17
  lack of contribution to sodium reabsorption (abstr.), 180

Basement membrane
  immunity to membrane in nephritis (abstr.), 179
Buffering capacity
  inside muscle cell in experimental potassium depletion, 159

Calcium
  reduction in milk with ion-exchange resin, 175
  renal handling during mineralocorticoid escape, renal excretion, homeostasis and vitamin D, 279
Central core model
  for concentration of urine, 85
Chronic renal disease
  concentrating defect in polycystic kidney disease, 107
  glomerular deposits in systemic lupus, 33
  prevention of secondary hyperparathyroidism in experimental renal disease, 147
Coagulation
  in renal disease, 183
Collagen
  in glomerular basement membrane in nail-patella syndrome, 231
Colloids
  effect of luminal application on reabsorption, 203
Colloid osmotic pressure
  estimation in plasma, 51
  determination of proximal reabsorption, 203
Computer model
  for renal countercurrent system, 264
  simulation of osmotic gradient without active transport, 271
Concentrating mechanism
  central core model, 85
  defect in patients with polycystic kidney disease, 107
  countercurrent system without active transport, 214
  computer model for renal countercurrent system, 264
  computer simulation of osmotic gradient without active transport, 271
  role of loop of Henle, 297
Corn starch
  embolization in renal transplants, 291
Countercurrent system
  central core model for urinary concentration, 85
  multiplication system without active transport, 214
  computer model, 264
  simulation of osmotic gradient without active transport, 271
  role of loop of Henle in urinary concentration, 297
Cyclophosphamide
  summary of workshop on benefit/risk of therapy, 352

Dialysis
  detection of clots in A-V cannulas (abstr.), 180
  effect of ultrafiltration on dialysance in coils,
Dialysance
  influence of ultrafiltration in coils, 293
Diuresis
  saline diuresis and redistribution of GFR, 191
  defect in sodium transport in postobstructive diuresis, 304
  phosphate excretion during saline diuresis in rat, 318
Drug metabolism
  by liver microsomes in uremia, 152

E. coli
  humoral immune capacity to recurrent infection, 287
Editorials
  kidney and uric acid excretion, 115
  coagulation in renal disease, 183
  Vitamin D and the kidney and calcium homeostasis, 241
  role of loop of Henle in urinary concentration, 297
Effective filtration pressure
  calculation from sieving equations, 131
Embolization
  corn starch embolization in renal transplants, 291
Estradiol
  renal receptor molecules and sodium excretion, 95
Estrogens
  estradiol-dependent antinatriuresis, 95
Excercise
  hemodynamic effects of arteriovenous fistulas, 344
Extracts
  urinary extracts from salt-loaded man, 1

Fistula
hemodynamic effects of arteriovenous fistulas, 344
Flagellin
humoral immune capacity to E. coli infection, 287

Glomerular basement membrane
immunity in nephritis (abstr.), 179
in nail-patellar syndrome, 231
Glomerular deposits
in systemic lupus erythematosus, 33
Gomerular hydrostatic pressure
relation to distal NaCl delivery, 22
estimation from use of sieving equations, 131
Glomerular filtration rate
control via tubulo-vascular feedback, 22
isotonic saline loading and redistribution, 191
Glomerular vasculature
in ageing and renal disease, 214
effect of angiotensin, 336
Glucagon
induction of natriuresis, 76
Glomerulonephritis
experimental model for study of salt and water excretion, 271
Glomerulus
discovery of, 349
effect of angiotensin, 336

Hemodialysis
detection of clots in A-V cannulas (abstr.), 180
effort of ultrafiltration on dialysance in coils, 293
hemodynamic effects of arteriovenous fistulas, 344
Henoch-Shonlein nephritis
clinical evaluation (abstr.), 179
Historical Perspective
Marcello Malpighi, 349
Hydrostatic pressure
glomerular hydrostatic pressure and distal NaCl delivery, 22
in proximal tubules and peritubule capillaries of dog, 11
Hyperparathyroidism
prevention in uremia by reduction of dietary phosphorus, 147
Hypothermic storage
membrane ATPases and electrolyte transport in kidney slices, 17

Immunity
in systemic lupus erythematosus (abstr.), 178
cell-mediated immunity in nephrotic syndrome (abstr.), 179
to glomerular basement membrane in nephritis (abstr.), 179
Intracellular pH
in experimental potassium depletion, 159
Intercellular space
in Necturus proximal tubule during volume expansion, 324

Isolated perfused kidney
renin release and renin-substrate reaction, 6
Isolated perfused kidney
serum proteins and fluid reabsorption, 66

Latex
injection as aid to histological identification, 54
Loop of Henle
role in urinary concentration, 297
Lupus erythematosus
glomerular deposits, 33
clinical, histological and immunological follow-up (abstr.), 178
experimental approach (abstr.), 178
cellular immunity (abstr.), 178

Malpighi, Marcello
historical perspective, 349
Micro-angiography
in ageing and renal disease, 214
Micropuncture
glomerular hydrostatic pressure and distal NaCl delivery, 22
latex injection as aid to histological identification, 54
hydrostatic pressures in proximal tubules and peritubular capillaries of dog, 11
estimation of colloid osmotic pressure in plasma, 51
serum proteins and fluid reabsorption, 66
glucagon-induced natriuresis, 76
uremia and proximal reabsorption, 59
before and after the release of ureteral obstruction, 119
luminal application of colloids and reabsorption, 203
potassium infusion and proximal sodium reabsorption, 197
postobstructive diuresis, 304
phosphate excretion during saline diuresis in rat, 318
Microsomes
metabolism of drugs in uremia, 152
Milk
reduction of calcium and potassium content, 175
Mineralocorticoid "escape"
handling of calcium and phosphorus by kidney, 279
Muscle
intracellular pH in potassium depletion, 159

Nail-patella syndrome
renal disease and morphological studies, 231
Necturus
proximal tubule structure/function relationships, 324
Nephrotic syndrome
cell-mediated immunity (abstr.), 179

Obstructive nephropathy
micropuncture study before and after release of ureteral obstruction, 119, 304
defect in sodium transport in postobstructive diuresis, 304

Parathyroid hormone
prevention of secondary hyperparathyroidism by reduction of dietary phosphorus, 147
vitamin D and the kidney and calcium homeostasis, 241
Parathyroidectomy
influence on phosphate excretion by dog, 247
Phosphorus
proportional reduction of dietary phosphorus and prevention of secondary hyperparathyroidism, 147
volume expansion and phosphate excretion in dog, 247
renal handling during mineralocorticoid escape, 279
excretion during saline diuresis in rat, 318
Podocytes
effect of angiotensin, 336
Polycystic kidney disease
defect in urine concentration, 107
Postobstructive diuresis
defect in sodium transport, 304
Potassium
reduction in milk with ion-exchange resin, 175
intracellular pH in potassium depletion, 159
effect on proximal sodium reabsorption, 197
Preservation
membrane ATPase and electrolyte transport during hypothermic storage, 17
Proteins
effect on fluid reabsorption by proximal tubule, 66
luminal application and proximal reabsorption, 203
Proximal tubule
hydrostatic pressure, 11
serum proteins and fluid reabsorption, 66
uremia and sodium reabsorption, 59
luminal application of colloids and reabsorption, 203
potassium infusion and reabsorption, 197
structure/function relationships in Necturus, 324
Pyelonephritis
immunological aspects (abstr.), 179
humoral immune capacity to recurrent E. coli infection, 287

Renal disease
glomerular deposits in SLE, 33
polycystic kidney disease, 107
altered sodium and water excretion, 164
nail-patella syndrome, 231
intrarenal vascular changes, 224
coagulation in renal disease, 183
Renin
release by isolated perfused rabbit kidney, 6
release during potassium infusion, 197
Renin substrate
reaction in the isolated perfused kidney, 6
Resin
used to reduce calcium and potassium in milk, 175

Saline diuresis
isotonic saline and redistribution of GFR, 191
Scanning electron microscopy
effect of angiotensin on rat glomeruli, 336
Shunts
hemodynamic effects of arteriovenous fistulas, 344
Sieving equations
calculation of effective filtration pressure, 131
Sodium
glomerular hydrostatic pressure and distal NaCl delivery, 22
effect of urinary extracts on urinary sodium excretion, 1
effect of serum proteins on proximal transport, 66
glucagon-induced natriuresis, 76
estradiol-dependent antinatriuresis, 95
uremia and proximal sodium reabsorption, 59
altered excretion in renal disease, 164
reabsorption not mediated by ATPase (abstr.), 180
effect of potassium infusion on proximal reabsorption, 197
isotonic saline loading and GFR in dog, 191
excretion and retention in experimental nephrotoxic glomerulonephritis, 271
transport defect in postobstructive diuresis, 304
Solute excretion
alterations in chronic renal disease, 164
Starch
corn starch embolization in renal transplants, 291
Systemic lupus erythematosus
glomerular deposits, 33
clinical histological and immunological follow-up (abstr.), 178
viral-like inclusions (abstr.), 178
experimental approach (abstr.), 178
cellular immunity (abstr.), 178

Threshold
phosphate excretion by dog during volume expansion, 247
Transplantation
corn starch embolization, 291
Transport
electrolyte transport and membrane ATPases in kidney slices, 17
relation between ATP and uptake of d-aminoisobutyric ATPase and sodium reabsorption (abstr.), 179

Ultrafiltration
effect on dialysance of coils, 293
Urea
role in central core model for urinary concentration, 85
role in countercurrent mechanism, 214, 264
Uremia
proximal sodium reabsorption, 59
prevention of secondary hyperparathyroidism, 147
drug metabolism by liver microsomes, 152
treatment with low calcium and potassium milk, 175
immune responses (abstr.), 179
Uric acid
excretion by kidney, 115

Vasculature
intrarenal changes in ageing and renal disease, 224

Vitamin D
calcium homeostasis and renal excretion, 241
Volume expansion
influence on phosphate excretion by dog, 247

Water
altered excretion in human chronic renal disease, 164
altered excretion in experimental nephrotoxic glomerulonephritis, 271
Workshop
summary of benefit/risk ratio of cyclophosphamide, 352

Zonula occludens
in Necturus proximal tubule during volume expansion, 324

Contents for Volume 2

July—December, 1972

Number 1, July 1972

Effect of urinary extracts from salt-loaded man on urinary sodium excretion by the rat. *Peter R. Brown, Kosta G. Koutsaimanis and Hugh E. de Wardener* 1

Renin release and renin-substrate reaction in the isolated perfused rabbit kidney. *P. Krahé, H. Orth, L. Miksche and F. Gross* 6

Hydrostatic pressures in proximal tubules and peritubule capillaries in the dog. *Franklyn G. Knox, L. R. Willis, Jack W. Strandhoy and Edward G. Schneider* 11

Effect of hypothermic storage of kidney slices on membrane ATPase and electrolyte transport. *Beatrice States, Philip Holtzapple, Mary Rosenhagen and Stanton Segal* 17

Relation of distal tubular NaCl delivery and glomerular hydrostatic pressure. *Roland C. Blantz, Arnold H. Israelit, Floyd C. Rector, Jr. and Donald W. Seldin* 22

The distribution and character of glomerular deposits in systemic lupus erythematosus. *Isabel Dujovne, Victor E. Pollack, Conrad L. Pirani and Martin G. Dillard* 33

On estimating colloid osmotic pressure in pre- and postglomerular plasma in the rat. *Barry M. Brenner, Iris F. Ueki and Terrance M. Daugharty* . . . 51

Intraluminal latex injections: An aid to the histological identification of renal tubules following micropuncture. *C. Craig Tisher and J. R. Clapp* 54

Announcements 57

Number 2, August 1972

The influence of uremia on fractional sodium reabsorption by the proximal tubule of rats. *Raymond G. Schultze, Fred Weisser and Neal S. Bricker* 59

Influence of serum proteins on net fluid absorption of isolated proximal tubules. *Jared J. Grantham, Patti B. Qualizza and Larry M. Welling* 66

The mechanism of glucagon-induced natriuresis in dogs. *Mortimer Levy and Neil L. Starr* 76

Concentration of urine in a central core model of the renal counterflow system. *John. L. Stephenson* . . 85

Estradiol renal receptor molecules and estradiol-dependent antinatriuresis. *James R. DeVries, James H. Ludens and Darrell D. Fanestil* 95

ATP content of rat kidney cortex slices: Relation to α-aminoisobutyric acid uptake. *Claire Rea and Stanton Segal* 101

Adult polycystic kidney disease: Studies of the defect in urine concentration. *Manuel Martinez-Maldonado, Jackson J. Yium, Garabed Eknoyan and Wadi N. Suki* 107

Announcements 114

Number 3, September 1972

The kidney and uric acid excretion in man. *Edward W. Holmes, William N. Kelley and James B. Wyngaarden* 115

Micropuncture study of chronic obstructive nephropathy before and after release of obstruction. *Douglas R. Wilson* 119

Sieving equations and effective glomerular filtration pressure. *P. P. Lambert, A. Verniory, J. P. Gassee and P. Ficheroulle* 131

On the prevention of secondary hyperparathyroidism in experimental chronic renal disease using "proportional reduction" of dietary phosphorus intake. *Eduardo Slatopolsky, Sali Caglar, Liliana Gradowska, Janet Canterbury, Eric Reiss and Neal S. Bricker* 147

Oxidative drug metabolism in liver microsomes from uremic rats. *Heinrich W. Leber and Georg Schütterle* 152

The effect of acute potassium depletion on muscle cell pH *in vitro*. *Sheldon Adler, Barbara Zett and Barbara Anderson* 159

Alterations in renal tubular sodium and water reabsorption in chronic renal disease in man. *Thomas Kahn, Ghani Mohammad and Richard M. Stein* 164

Reduction of potassium and calcium in milk by sodium sulfonated polystyrene resins. *Wesley C. Starbuck* . 175

Abstracts, Société de Néphrologie, May 7, 1972 . . . 178

The Renal Association, May 11, 1972 179

Announcements 181

Number 4, October 1972

Coagulation and renal disease. *Priscilla Kincaid-Smith* 183
Isotonic saline loading and intrarenal distribution of glomerular filtration in dogs. *Serge Carriere, Pierre Boulet, Andrée Mathieu and Michèle G. Brunette* . 191
The effect of potassium infusion on proximal sodium reabsorption and renin release in the dog. *Edward G. Schneider, R. E. Lynch, Lynn R. Willis and Franklyn G. Knox* 197
The effect of luminal application of colloids on rat proximal tubular net fluid flux. *A. Erik, G. Persson, Bengt Ågerup and Jürgen Schnermann* 203
Countercurrent multiplication system without active transport in inner medulla. *Juha P. Kokko and Floyd C. Rector, Jr.* 214
Intrarenal vascular changes with age and disease. *Eisuke Takazakura, Norio Sawabu, Akira Handa, Akira Takada, Akira Shinoda and Jugoro Takeuchi* 224
Renal disease in the nail-patella syndrome: Clinical and morphologic studies. *John R. Hoyer, Alfred F. Michael and Robert L. Vernier* 231
Announcements 239

Number 5, November 1972

Vitamin D, the kidney and calcium homeostasis. *Louis V. Avioli* 241
Decreased phosphate reabsorption by volume expansion in the dog. *Christy S. Hebert, Diane Rouse, Garabed Eknoyan, Manuel Martinez-Maldonado and Wadi N. Suki* 247
A computer model of the renal countercurrent system. *John Stewart, Michael E. Luggen and Heinz Valtin* 253
Computer simulation of osmotic gradient without active transport in renal inner medulla. *John Stewart and Heinz Valtin* 264
Sodium and water retention in experimental glomerulonephritis. *J. P. Godon* 271
Renal handling of calcium and phosphate during mineralocorticoid "escape" in man. *Asghar Rastegar, Zalman Agus, Thomas B. Connor and Martin Goldberg* 279
Humoral immune capacity in recurrent E. coli upper urinary tract infection. *Judith A. Whitworth, Kenneth F. Fairly and Ian R. Mackay* 287
Corn starch embolization in renal transplants. *Kyung-Whan Min, Jackson J. Yium, Ferenc Gyorkey, James Bergeron and Manuel Martinez-Maldonado* 291
Effects of ultrafiltration on dialysance in commercially available coils. *Karl D. Nolph, Richard J. Nothum and John F. Maher* 293
Announcements 296

Number 6, December 1972

Physiological role of the loop of Henle in urinary concentration. *Christian de Rouffignac* 297
Defect in proximal and distal sodium transport in post-obstructive diuresis. *W. Scott McDougal and Fred S. Wright* 304
Phosphate handling by the rat nephron during saline diuresis. *Henri Kuntziger, Claude Amiel and Claude Gaudebout* 318
Proximal tubule structure-function relationships during volume expansion in Necturus. *Carl J. Bentzel* . . 324
The effect of exogenous angiotensin on superficial and deep glomeruli in the rat kidney. *Helena Hornych, Michel Beaufils and Gabriel Richet* 336
Exercise-induced hemodynamic effects of arteriovenous fistulas used for hemodialysis. *Robert M. Payne, Robert E. Soderblom, Phil Lobstein, Alan R. Hull and Charles B. Mullins* 344
About the glomerulus. *Vittorio E. Andreucci* 349
Announcements
Summary Report of International Workshop on Risk/Benefit Assessment of Cyclophosphamide in Renal Disease, June 11–13, 1972 352
Indexes 354
